PIXELS

A Collaborative Juried Exhibition with the National Association of Digital Artists (NaDA)

November 22, 2023 - February 11, 2024

Juror: Nicki Fitz-Gerald, founder iPhoneography Central Ltd.

Digital Art is an artistic work or practice that uses digital technology as an essential part of the creative process. This includes the use of computers, mobile phones or portable handheld devices in conjunction with a variety of apps. Digital art can take many forms—"paintings" made entirely of pixels, collage, original photography, animation and video.

Over 190 Digital Artworks were submitted to this "call for art." Only 45 artworks (including 6 videos) were juried into the exhibition, which can also be viewed online at www.CCMoA.org/pixels

www.CCMoA.org/pixels
